

# A new policy solution

The SDGs need countries to reach a wide range of integrated development goals and targets, with limited resources.

Cluver, L, Orkin, FM, Campeau, L, Toska, E, Webb, D, Carlqvist, A, Sherr, L. (2019). Improving lives by accelerating progress towards the UN Sustainable Development Goals for adolescents living with HIV: a prospective cohort study. *Lancet Child & Adolescent Health*. 3: 254–54. [www.thelancet.com/journals/lanchi/article/PIIS2352-4642\(19\)30033-1/fulltext](http://www.thelancet.com/journals/lanchi/article/PIIS2352-4642(19)30033-1/fulltext)

## The first study of its kind

This is the first study to test accelerators. We chose a highly vulnerable group: a thousand adolescents living with HIV in rural and urban South Africa.

At a glance:

# 1063

adolescents living with HIV

South Africa

Eastern Cape

## 7 SDG targets improved

## Accelerator Synergies

Highly effective accelerator combinations improve multiple SDGs for Africa's most vulnerable adolescents.

Greater positive impacts on SDG targets

More SDGs reached

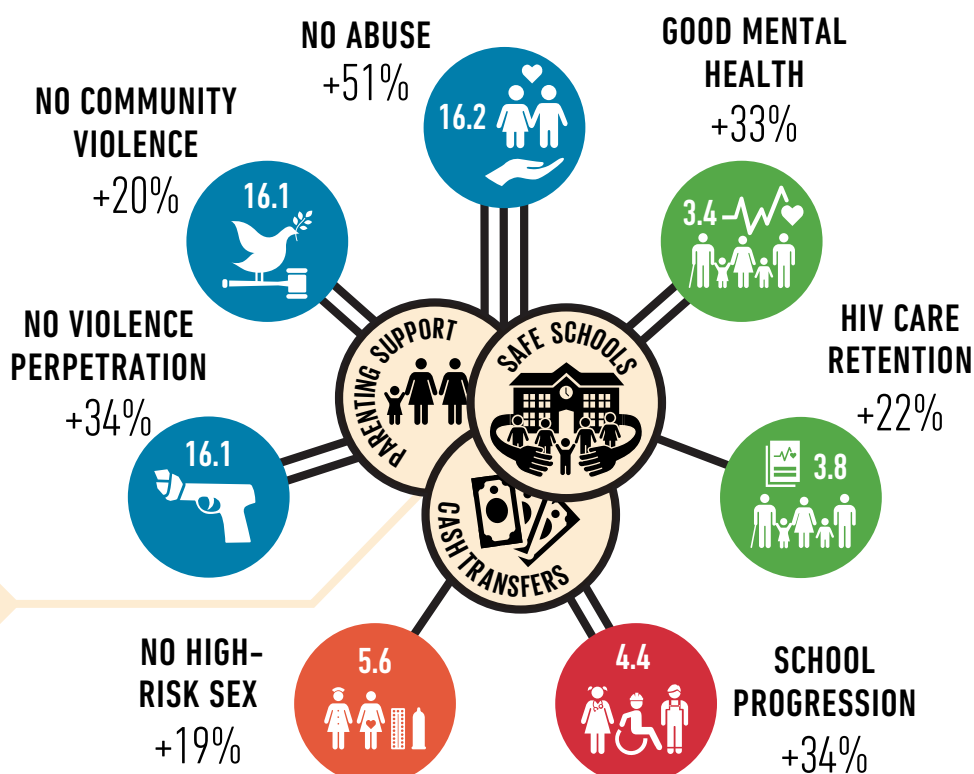

## Adolescents - the future of Africa

There will be half a billion adolescents in Africa by 2050. Their success is key for the future of the continent, but most face severe challenges in reaching the SDGs.

## A UN solution

Accelerators are a UN development system approach for interventions that impact across multiple SDGs and dimensions of development (social, economic, and environmental).

# Gains across multiple development domains

## Accelerator synergy unpacked

Each development accelerator has multiple SDG impacts; together their effect is greatest

## Accelerator 1 Parenting support

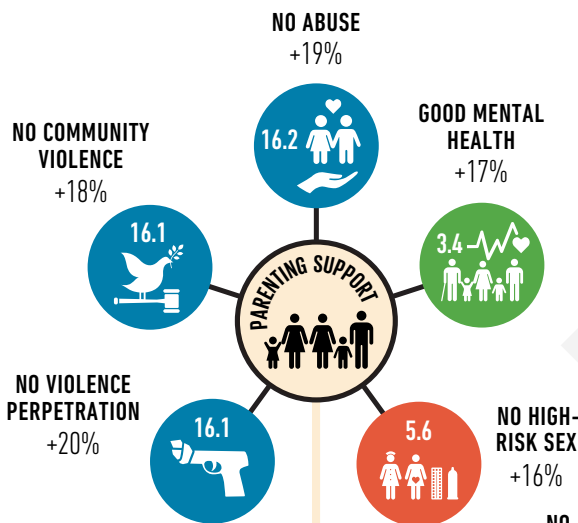

Good supervision of adolescents by a primary caregiver improved incidence of 5 SDG targets in health, sexual risk, violence and abuse prevention.

## Accelerator 2 Safe schools

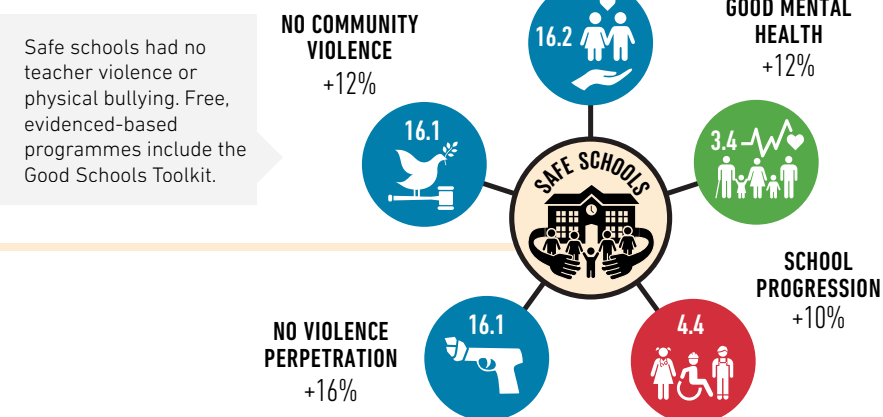

Safe schools improved incidence of 5 SDG targets in health, education, violence and abuse prevention.

## Accelerator 3 Cash transfers

Small, monthly household cash transfers improved incidence of 3 SDG targets in health, education and abuse prevention.

Supervision included knowing who adolescents' friends are and set times to be home. Free, evidenced-based programmes include Parenting for Lifelong Health, Families Matter! and Families Make the Difference.

Cash transfers include the South African child support grant and the Kenya OVC grant.
